

Tree Survey.

18/6/06.

Over the weekend Cory was down from Hamilton with the latest draft of the document.

Rob Graham (Wintech) has updated our modifications and supplied a disk and hard copy to that stage.

My task was to ensure that corrections & additions that we had agreed on in April were included.

Most were taken care of. Those that weren't plus a few formatting errors will be corrected on the disk by Cory & that will see the completion of the compiling of the survey, probably within a week.

Rob Graham has indicated that he is willing to print off a hard copy for Cory & myself plus a limited number for the likes of N.P. Library, Bryan Gould (N.P.D.C), RNZIH (National Tree Register) & Friends of the Park free of charge and make available to interested parties further copies at a charge of \$25 per copy.

David Medway considered that this was the most practical next step, protecting intellectual property rights consistent with releasing the information to those most interested. G. S.
